## **APARTADO A**

# Instalación del JDK-7

### Instalación del JRE-7

### Configuración de las variables de entorno PATH y CLASSPATH

## Localización de javac.exe y java.exe

### Visualizando la variable de entorno PATH

### Añadiendo la ruta "C:\Program Files\Java\jdk1.7.0\bin" a la variable PATH

### Localización del directorio lib de java

### Visualizando la variable CLASSPATH

#### Creando la variable de entorno CLASSPATH

### Verificando la versión JSE instalada

## Compilación, listado del directorio y ejecución del programa

#### **APARTADO B**

Instalación de NetBeans, apertura y ejecución del programa PROG01 programa1.java

Para la compilación se ha creado un nuevo proyecto vacio en NetBeans y se ha copiado el archivo PROG01 programa1.java al directorio \src del proyecto.
